

Don't let NAB stand in the way of the free market. Satellite radio is the future and it offers what Clear Channel and Bonniville don't have the good sense to offer... Variety. Satellite radio should not be stifled by a bunch of big slow corporate suites that want to protect their little kingdom.

Many people benefit from local information on satellite radio.

I do NOT support the NABs efforts to try and dictate what can be broadcast by its competitor. And I strongly urge you not to support this protectionist policy either.
